KEY RESPONSIBILITIES

- Administer adaptive, psychological, and neuropsychological testing under the supervision of a licensed clinical neuropsychologist
- Serve a diverse clientele, including individuals receiving coverage through Medicare and Medicaid
- Independently implement a culturally sensitive, semi-flexible testing battery
- Coordinate care and referrals with other members of the client's treatment team
- Maintain accurate files and billing using our EHR system
- Participate in required team meetings, in-services, and supervisory sessions

EDUCATION & EXPERIENCE REQUIREMENTS

Required Education:

Doctorate degree (PhD or PsyD) in Clinical Psychology

Preferred Experience:

- Experience administering psychological and neuropsychological testing measures
- Previous work with individuals from diverse backgrounds, SPMI, and/or neurodevelopmental concerns

OUR MISSION AND CULTURE

At Boulder Neuropsychological Services, we treat clients from all walks of life, with an emphasis on people who need our help the most (including those on government assistance).

We are a growing practice that values:

Compassion and Honesty: We believe in honesty with our clients and one another.

A Strong Relational Approach: We seek fellows who can balance this with evidence-based practices.

A Broad Focus: We provide services for individuals across the lifespan.

We are looking for a self-sufficient candidate who loves this work, generates positive regard for their clients, and appropriately manages crises through consultation.

READY TO APPLY?

Please send us a brief cover letter, a copy of your CV, and 2 de-identified reports to info@boulderneuro.co
